

**COMMUNITY VACCINATION BOOSTER UPDATE
TEXAS EMERGENCY HOSPITAL VACCINE HUB
NOW VACCINATING 5 – 11, YEARS OLD
NOVEMBER 15, 2021**

On November 2, 2021, the CDC Director endorsed the CDC Advisory Committee on Immunization Practices' (ACIP) recommending that children 5 through 11 years of age be vaccinated against Covid-19 with the Pfizer-BioNTech pediatric vaccine.

The Texas Emergency Hospital Vaccination Hub has received the Pfizer-BioNTech pediatric vaccine and will begin today, Monday, November 15, 2021, administering the vaccine to children 5 to 11 years of age.

Children 5 through 11 years old will receive a separate vaccine formulation denoted with an orange cap of the Pfizer-BioTech Covid-19 Vaccine that has one-third the dose given to adolescents and adults and will receive the vaccine with a smaller needle.

NO APPOINTMENT IS REQUIRED TO RECEIVE THE PEDIATRIC VACCINATION. A parent or legal guardian will need to be present, along with their identification and insurance card (if applicable).

Our Vaccination Hub continues to provide the Pfizer-BioNTech Covid-19 vaccine for first and second dose administrations. Pfizer-BioNTech and Moderna booster shots are available, and an individual may choose which vaccine they receive as a "mix-and-match" booster dose. Individuals who received a Covid-19 vaccination are eligible at 6 months or more after their series and meet the following criteria:

- 65 years and older
- Age 18+ who have underlying medical conditions
- Age 18+ who work or live-in high-risk settings

Please visit our website www.emergencyhospitals.care for more Covid-19 vaccination information.

We continue to encourage everyone to receive your Covid-19 vaccination, wear a face covering, practice social distancing, and use proper hand hygiene to continue the fight to end Covid-19!

Thank you for your continued support for Emergency Hospital Systems! We look forward to continuing to serve our community and provide the Covid-19 vaccine!
